Tuesday, Nov 11th

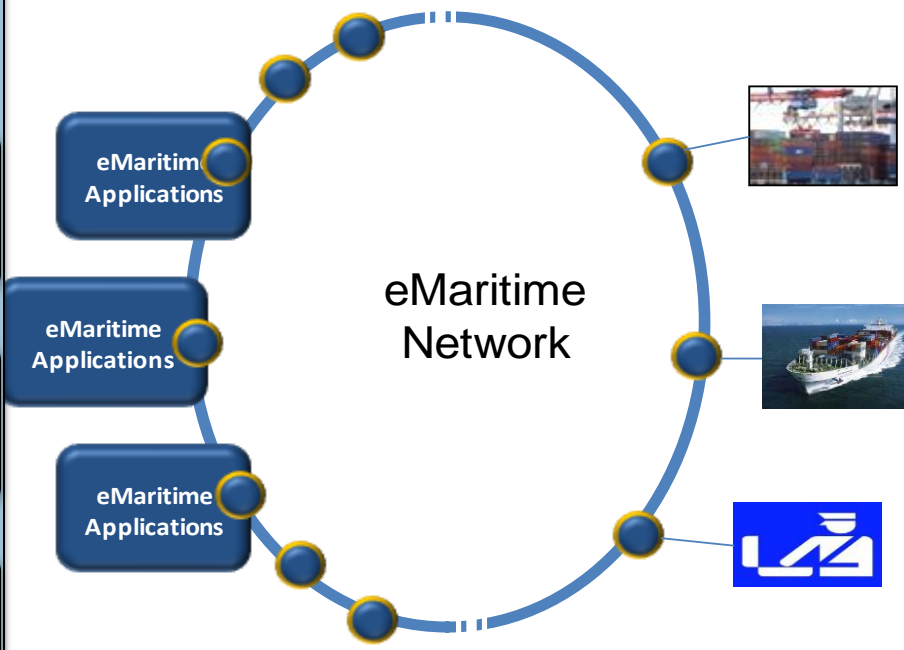

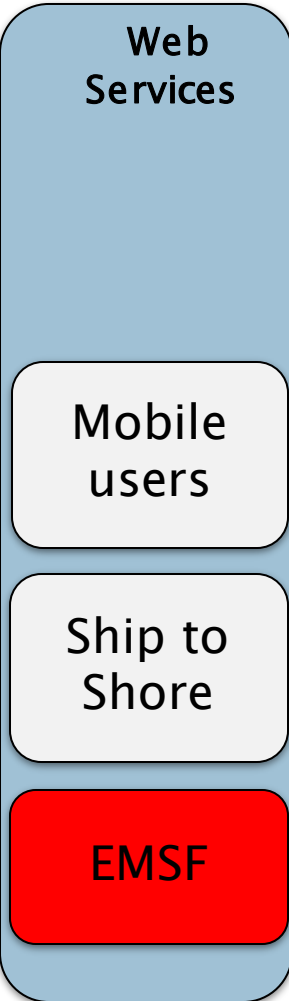

eMAR WP3 (ST3.2.1)

Interface Danaos applications

Interoperability Improvements

European Maritime Strategic Framework

Key Market Requirements

- Full control on the disclosed information
(*Commercial confidentiality*)
- Flexible standards to meet business needs
- Access to public and market data
like port info, market indexes, rates, etc.
- Outsourcing support
- Collaboration services
like e-invoicing, e-procurement, e port clearance
- Without disturbing today's business reality

“The professional network for shipping”
“It is all about collaboration”

Platform's Innovation Today's reality

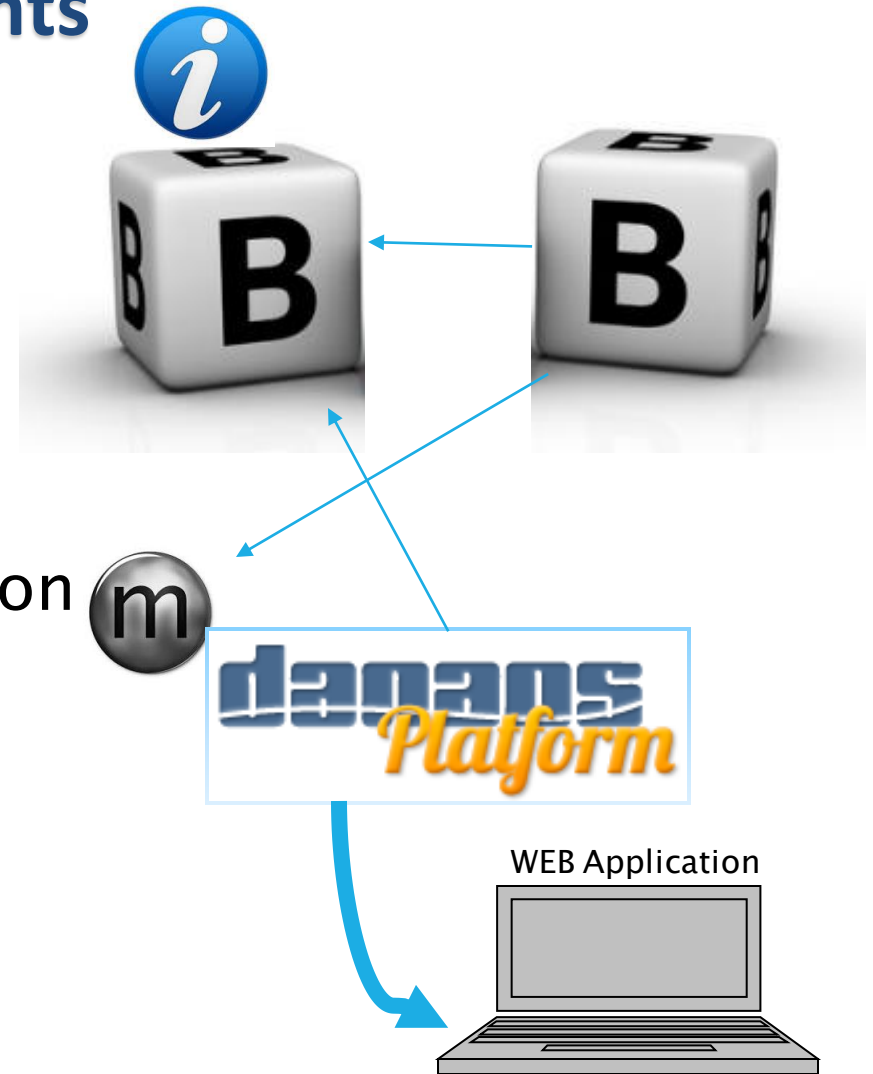

The “**methodos**TM” concept
Offers full control on
your information &
access rights

Dominant meaning of the “methodos” is methodology. This international term (method, methode, methodo) comes from the Greek verb “μετέχουμι” which means method, is generally defined a set of appropriate principles, rules and means followed for a specific objective, or a set of coordinated processes and policies that increase the chances of the outcome of that intent.

Additional Improvements

To support smaller organization
Have access to information
Under your full control

Released in June 2014 Today

- Has currently 300+ Shipping stakeholders doing business
 - e-invoicing, account reconciliation, etc.
 - e-procurement (quotations)
 - contract negotiations
 - e-drawings, port info & expenses
- Very active social role
 - Via the yellow pages
 - The forums
 - The M/S link video conferencing.....

THANK YOU

The Project
EMAR 'e-Maritime Strategic Framework and Simulation based Validation'
The EMAR project aims to empower the European maritime sector in offering efficient quality shipping services fully integrated in the overall European transport system over an upgraded information management infrastructure.
The EMAR approach will facilitate extensive participation of the European maritime public, business and research community in a knowledge development process leading to the specification of the e-Maritime Strategic Framework.
